PROJECTS

Youtube Clone (Web-Based)

Designed and developed the frontend of a YouTube-inspired video-sharing platform. The project focuses on replicating the user interface and enhancing the user experience.

- Tech Stack:
HTML5 , CSS3 , JavaScript

Java console based online shopping

Developed a console-based online shopping system using Java. The project allows users to browse products, add them to a cart, and simulate the checkout process.

- Key Features:
Product Catalog: Displayed a list of products with details like name, price, and category.
User Cart Management:
Add, remove, and view items in the cart.
Calculate total price with quantity updates.
- Tech Stack:
Programming Language: Java
IDE: Eclipse
